Description

Description

1. 1. Symptoms
- Finance user was unable to sign in to the domain workstation using their current known password.
 - Login attempt returned an incorrect username/password authentication error.
1. 1. Scope / Impact
- Affected user(s): Finance Test User
 - Device(s):Windows AD Client
 - Department: Finance
 - Business impact: User could not access the workstation or begin work until credentials were reset.
1. 1. Environment
- Hostname: WindowsADClient
 - OS: Windows 10 Pro
 - Location/VPN: internal lab / domain-connected workstation
 - Related systems/services: Active Director , ADUC, domain authentication.
1. 1. Baseline Checks
- Connectivity: Workstation was domain-connected
 - Account status: User account located in ADUC and available for reset.
 - Licensing/access: N/A
 - Error messages: "The user name or password is incorrect. Try again."
 - Recent changes: None noted before reset action.
1. 1. Troubleshooting Performed
1. Reproduced sign in failure at the workstation using the users prior known password.

2. Located the Finance user in Active Directory Users and Computers.
3. Reset password in ADUC and selected User must change password at next logon.
4. Confirmed the reset completed successfully
5. Logged back in with temporary password and completed the required password change.
6. Validated successful access after the password update.

1. 1. Findings

- Authentication issue was successfully reproduced at the workstation
- Password reset workflow completed successfully in ADUC.
- User was able to sign in after changing the password at next logon.
- No additional account lockout, disablement, or workstation issue was observed.

1. 1. Root Cause

- User could not authenticate because the prior password was no longer valid/usable, requiring a standard password reset.

1. 1. Resolution

- Reset the Finance test user password in Active Directory
- Forced password change at next logon.
- User completed password update successfully and regained workstation access.

1. 1. Validation

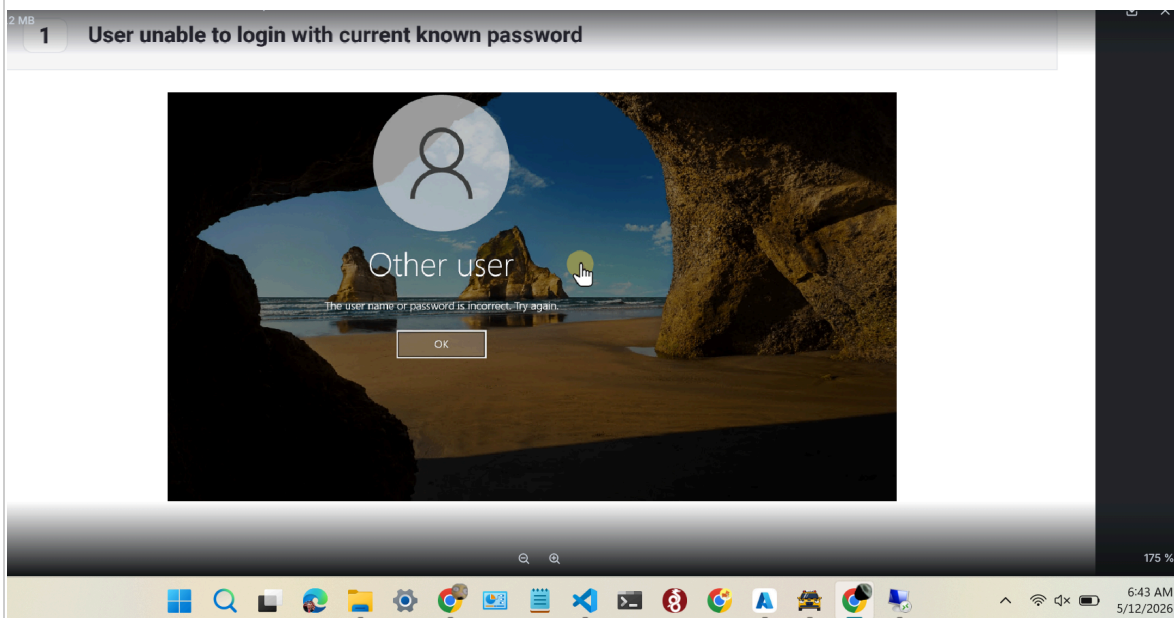

- User confirmed: Able to sign in after reset.
- Functionality tested: Domain login completed successfully
- Additional verification: Desktop session loaded successfully under the user account.

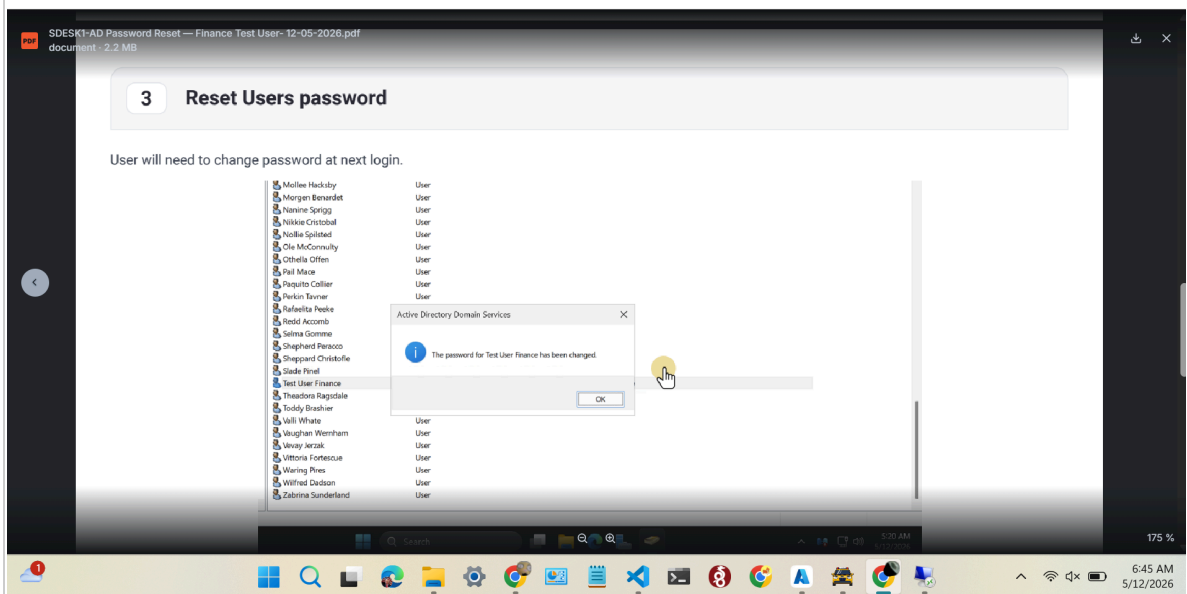

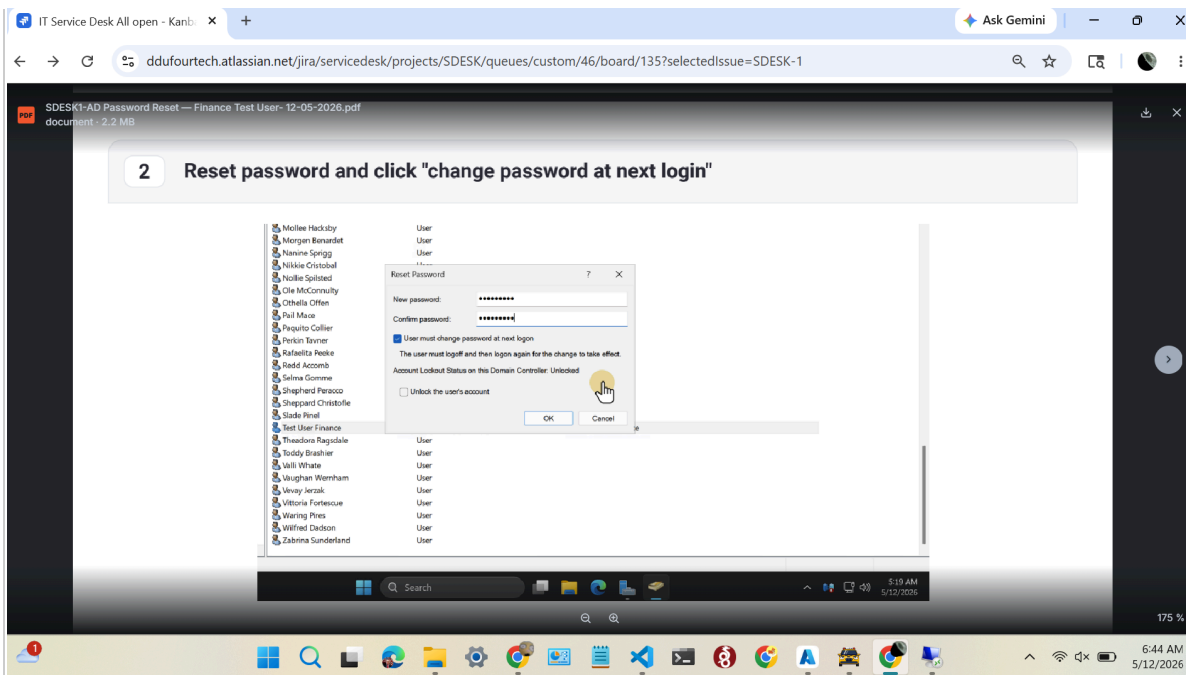

1. 1. Closure Notes

-Access restored through standard help desk password reset procedure.

-No escalation required.

-Ticket can be closed as resolved.
